

AQUASHIELDX SERIES ENGINEERED FOR THE EXTREMES

The Solution

AquaShieldX was built to thrive where others fail — outperforming standard formulations by up to 200% in aggressive aqueous and high-heat conditions.

- **Repels** harsh acids up to 14% HCl instead of absorbing them.
- **Withstands** hot water and caustic solutions without losing performance.
- **Maintains** nip settings for consistent squeeze and even pressure.

The Key Properties That Make It Different

- **Outstanding hardness stability** (it stays the same shape under stress)
- **Excellent abrasion resistance** (it doesn't wear away easily)
- **Heat resistance up to 295°F**
- **Excellent resiliency** (it bounces back to shape every time)
- **Superior tensile and tear strength** (it won't rip under heavy loads)
