

THE UPGRADE THAT PAYS FOR ITSELF

EMBOFLEX PRO 9XI16-7 SERIES COMPOUND

Backed By The Industry's Best Warranty

A Smarter Roll Covering for Tissue Manufacturers

If your embossing rolls wear out too fast, your production slows down, costs go up, and the quality of your tissue suffers. The EmboFlex Pro 9XI16-7 Series is built to solve that.

Feature / Benefit	EmboFlex Pro 9XI16-7 Series	Standard Roll Coverings
Durability	Lasts up to 150% longer	Wears out quickly under pressure
Consistency	Maintains uniform pressure consistently	Nip pressure changes over time
Tissue Quality	Produces softer, stronger, more uniform tissue	Can lead to uneven softness/strength
Resistance to Wear	High resistance to abrasion and wear	Prone to cuts, tears, and abrasion
Heat Tolerance	Handles up to 200°F without losing quality	Limited tolerance, may degrade
Performance in Wet/Dry Use	Stable in both wet and dry condition	Swells or deteriorates
Repair and Maintenance	Less downtime, fewer replacements	Frequent roll changes needed
Cost Over Time	Lower due to longevity and reliability	Higher from replacements and failures

The Bottom Line

With EmboFlex Pro 9XI16-7, your equipment runs longer, your tissue quality improves, and you spend less on replacements and downtime. **It is the upgrade that pays for itself.**
